
4102C / 4102M 100mm Strip Chart Recorders

- Entry Level Paper chart recorders
- General purpose chart recorders
- Pre-configured or user configurable
- OEM products

The 4102 are low cost, 100mm strip chart recorders, providing recording for up to 4 (continuous pen) or 6 (multi-point) process variables. Designed to fit a standard DIN panel cut out (138 x 138 mm), these recorders feature an exceptionally small back panel dimension of 236mm with the cover fitted, that makes them ideal for installations where space is at a premium.

Display

The 4102 is supplied with a high visibility, seven segment display – providing clear numeric indication of the process variables and alarm status. The display will cycle through each PV and paused on a particular channel if required.

Configuration

The addition of a keypad to the 4102 allows for configuration to be carried out on site. In order to prevent unauthorized access to the 4102, the configuration is password protected. Entry of the password provides access to the instrument configuration pages.

Modular design

The modular design of the 4100 Series allows for changes and upgrades to be performed while the instruments are in 'situ' and therefore minimizing any downtime.

FEATURES:

- Isolated universal inputs
- Standard thermocouple linearization
- Continuous pen recording
- Multi-point recording
- Large 7 segment numeric display (4102)
- Chart annotation time/date and messages
- User configuration
- Event inputs
